

Name: Muhammad Luqman
Roll No: FA24-BCS-074-B

Statement:

Assignment 1 — Your Personal CV Page

Task: Build a single-page personal CV/résumé as a static HTML + CSS website — no JavaScript, no framework, just semantic HTML5 and hand-written CSS. This is where you prove you actually know the raw building blocks before anything is allowed to hide them from you.

Your page must include, at minimum:

- A header with your name, a short professional tagline, and a photo (a placeholder image is fine).
- An “About Me” section.
- An “Education” section listing your academic history in a semantic list or table.
- A “Skills” section.
- A “Contact” section with a real `<a href="mailto:...">` link and at least one social/portfolio link.
- Correct use of semantic HTML5 elements throughout — `<header>`, `<nav>`, `<main>`, `<section>`, `<article>`, `<footer>` as appropriate, not a page built entirely out of unstyled `<div>`s.
- Styling entirely in a separate `styles.css` file (external stylesheet, not `inline style=""` attributes) using the box model correctly — sensible margins, padding, and borders, not everything jammed against everything else.

Languages

- English - Fluent
- Urdu - Native
- French - Basic

Education

BS Computer Science
COMSATS University Islamabad
2022 - 2026 (Expected)

About Me

Am I a final-year Computer Science student who enjoys turning a rough idea into a polished, working interface? Can never know for sure but Over the last two years I have built course projects, freelance landing pages, and a handful of small full-stack apps using the MERN stack. Outside of code, I like reading about type systems, tinkering with generative art, and mentoring first-year students who are just discovering how satisfying it is to make a browser do what you want.

Experience

Front-End Intern - BrightWave Software

2025 - Present

Rebuilt a marketing site's component library with accessible, responsive Flexbox and Grid layouts, cutting layout-related bug reports by a third.

Freelance Web Developer

2024 - 2025

Designed and shipped five landing pages and a small booking app for local businesses, handling everything from the HTML structure to deployment.

Projects

Campus Event Finder

A responsive event listing app with filtering, built with vanilla JS and a small Express API.

Technologies: HTML, CSS Grid, JavaScript

[View Project](#)

This Resume

A single-page resume laid out with pure HTML and CSS - no JavaScript, no build step.

Technologies: Flexbox, Positioning, Animation

[View Project](#)

Extra Feature:

The “No button” hides behind “Yes” when hovered

Accept candidate?

Click YES to accept candidate

No

Yes

Accept candidate?

Click YES to accept candidate

Yes
